Technical Skills

Languages: Javascript, Typescript, HTML/CSS, Java, Python, SQL

Developer Tools: React, Figma, Express, Git, MongoDB, NodeJS, OpenCV, PyTorch, SKlearn, Django

Work Experience

Ensemble Systems Inc | Software Developer

Sep. 2024 - May 2025

React, Next.js, LightningJS

- Built a secure test account authentication system using React-Query to improve authentication speed by 20%
- Engineered a robust token management system with JWT refresh and localStorage support, enhancing authentication reliability and session persistence
- Migrated client streaming platform to LightningJS 3, increasing performance by 25%
- Led sprint planning for a 4-person dev team, triaged 50+ tickets and reviewed 100+ PRs for smooth feature delivery

Royal Bank of Canada | Amplify Front-end Developer Intern

May 2023 - Aug. 2023

React, Django, Elasticsearch

- Architected and delivered a full-stack solution (React, ChartJS, Django, Elasticsearch) for real-time carbon emissions tracking, automating manual reporting by 95% and unlocking \$4M in projected annual savings
- Directed 25+ SME interviews to inform user flow design and Figma prototype development, improving usability and increasing stakeholder adoption by 30%
- Created real-time carbon data visualizations using ChartJS and React, powering insights across 10+ business units
- Deployed to OCP4 via Helios for scalable production delivery, enabling secure access through Azure AD OAuth2.0 flow

Royal Bank of Canada | Front-end Developer Intern

Sep. 2022 - May 2023

React, TypeScript, JavaScript

- Integrated 200+ internal apps into a central dashboard, reducing navigation time by 70% for RBC employees
- Implemented search and favorite functionality with localStorage, enhancing user personalization
- Shipped redesigned navigation bar to internal RBC domains, boosting website traffic by 40%
- Developed Node.js backend function to fetch HTML from URLs, bypassing CORS and enabling iframe display of previously blocked content, improving content accessibility across 100% of targeted use cases

Technical Projects

Step n' Out | Personal | [TimothySFang/StepnOut](https://github.com/TimothySFang/StepnOut)

Oct. 2024 - Present

React Native, Supabase, Typescript

- Built a cross-platform social app using React Native, launched on iOS and Android, enabling users to take on comfort zone challenges and connect through community support
- Nurtured customer relations with an emailing list of 400+ beta users to refine core features
- Refined UX/UI based on user feedback of 150+ responses, cutting the click path to core CTAs by 40%
- Partnered with Instagram influencer (180K+ Followers) to drive user adoption and expand app's reach

TimFolio | Personal | [TimothySFang.github.io/Timfolio](https://github.com/TimothySFang/Timfolio)

Nov. 2024 - Mar. 2025

React, JavaScript, React-Router, Tailwind CSS

- Launched a React.js web-portfolio viewed by 100+ users to showcase software and artistic work
- Designed 20+ components in Figma with accessibility and mobile-first design principles and styled with Tailwind CSS

Emailify | Personal | [TimothySFang/Emailify](https://github.com/TimothySFang/Emailify)

Dec. 2021 - Feb. 2022

React, JavaScript, MongoDB, NodeJS

- Developed a full-stack survey platform using React and Node.js, featuring bulk email delivery via SendGrid and secure payment handling through Stripe
- Integrated Google OAuth 2.0 login via Node.js, Express, and PassportJS for streamlined user access
- Stored user data including surveys, credits and Google OAuth2.0 tokens in MongoDB

Education

University of British Columbia, B.Sc, in Computer Science

Sep. 2020 - Present

Uppsala University, B.Sc, Go Global Program

Sep. 2023 - Jan. 2024
